Hanford's landfill to close; Richland to accept waste

DOE-RL and the City of Richland have reached an agreement that will soon send Hanford's non-radioactive, non-regulated solid waste to the public landfill.

ICF Kaiser officials hope to get the final agreement by the end of this

month. Medical waste, drummed non-regulated waste or asbestos will not be accepted at Richland's facility but will continue to be accepted at Hanford's Central Waste Landfill.

Once the agreement is finalized,

ICF Kaiser's Waste Handling will continue to pick up and service Hanford's estimated 350 refuse containers, trash luggers and wood luggers and haul them to Richland's landfill.

Waste not picked up by Waste Handling will be required to be hauled to

Richland's landfill which is located south of the Central Waste Landfill on Grosecup Road and northwest of Richland off Highway 240.

For more information, call Ken Johnson at 375-0845.
